Project Name	Electronic voting machine using block chain

BRAINSTORMING:

What went well? What should we keep doing? What should we celebrate? Where did we make progress?	Electronic voting machine	What went poorly? Where did we have problems? What was frustrating to us or others? What held us back?
redundancy		power dependency
security	user interface	limited accessibility
	upgradability	complexity
	😊	😞
	💡	📋
independent verification		prototype
blockchain technology		
public confidence		project planning
		requirement analysis
What ideas do you have? What ideas do you have for future work together? Where do you see opportunities to improve? What has untapped potential?		How should we take action? What do you believe we should do next? What specific things should we change? What should extend beyond this meeting?
